BEFORE THE BOARD OF OIL, GAS, AND MINING
DEPARTMENT OF NATURAL RESOURCES
in and for the STATE OF UTAH

IN THE MATTER OF THE APPROVAL OF THE)
NOTICE OF INTENT AND RECLAMATION PLAN)
SUBMITTED BY JERIKA MINING CORPORATION,)
JERIKA NOS. 1-51 MINE, TOOELE COUNTY, UTAH)

ORDER TO SHOW CAUSE
ACT/045/013

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION, MINERAL
AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS INTERESTED IN TOWNSHIP 10
SOUTH, RANGE 5 WEST, SLBM, TOOELE COUNTY, UTAH.

Notice is hereby given that tentative approval was given to
Jerika Mining Corporation by the Utah Division of Oil, Gas, and Mining
to commence underground lead, gold and silver mining on portions of Sections 15,16,21,
22, Township 10 South, Range 5 West, Tooele County, Utah. The name of the
mine is the Jerika Mine, and the person representing the company in this matter
is Mr. Richard C. Despain, Jerika Mining Corporation, 33 East 400 South, Orem,
Utah 84057.

Jerika Mining Corporation has fulfilled obligations under the
Mined Land Reclamation Act of 1975 (Section 40-8, U.C.A., 1953 as amended)
and will employ the following mining and reclamation techniques on 4 acres
which comprise the land affected. Legal access to the land affected is by
unpatented mining claims.

DURING OPERATIONS:

1. Topsoil will be bladed into storage piles and seeded to prevent erosion loss.
2. Mining will involve drifting based on long hole exploration.
3. Rock waste material will be placed at a dump location adjacent to the portal site. A dike will contain runoff from the dump. Most rock waste will be used to backfill mine drifts and to contour grade areas during reclamation.
4. The access road will be maintained as per Forest Service specifications.
5. Temporary facilities at the site include an equipment trailer, living trailer, compressor and various earthwork equipment.
6. Appropriate warning signs will be posted at the entrance to the mine site.

AFTER OPERATIONS:

1. The tunnel entrance will be backfilled and the highwall face will be blasted to further close the tunnel and reduce the slope.
2. All equipment and trash will be removed from the site.
3. The area will be graded and contoured and covered with the stockpiled soil.

4. The site will be seeded and revegetated with a mix recommended by the Forest Service.

5. All reclamation will be carried out in accordance with normal mining engineering practices and consultation with competent geologists and mining engineers will be sought.

Reclamation performance surety will be posted prior to final approval of the reclamation plan.

Any person or agency aggrieved by this tentative decision is hereby requested to submit written protest within 30 days from June 11, 1981, to the Division of Oil, Gas, and Mining, 1588 West North Temple, Salt Lake City, Utah 84116, setting forth factual reasons for his or her complaint, and thereafter, at a time and place heretobe established, appear before the Board of Oil, Gas, and Mining, to show cause, if any there be, why this plan should not be approved.

DATED this 2 day of June 1981.

STATE OF UTAH
BOARD OF OIL, GAS, AND MINING

Paula Frank
PAULA FRANK
SECRETARY OF THE BOARD
